Script / Utlity

Crea testo puntatore mouse immagini colorate

Lo script permette di creare un testo che segue il puntatore del mouse sullo schermo e, si ricompone ogni qual volta il puntatore si ferma. Inserire il codice tra i tags <head> e </head>:

```
<style>

.spanstyle {

        position:absolute;

        visibility:visible;

        top:-50px;

        font-size:10pt;

        font-family:Verdana;

    font-weight:bold;

        color:black;

}

</style>

<script>

/*

Cursor Trailor Text- By Peter Gehrig (http://www.24fun.ch/)

Permission given to Dynamicdrive.com to feature script in it's archive.

*/

var x,y

var step=20

var flag=0

// Your snappy message. Important: the space at the end of the sentence!!!

var message="Web-Link.it "

message=message.split("")

var xpos=new Array()
```

```javascript
for (i=0;i<=message.length-1;i++) {

        xpos[i]=-50

}

var ypos=new Array()

for (i=0;i<=message.length-1;i++) {

        ypos[i]=-50

}

function handlerMM(e){

        x = (document.layers) ? e.pageX : document.body.scrollLeft+event.clientX

        y = (document.layers) ? e.pageY : document.body.scrollTop+event.clientY

        flag=1

}

function makesnake() {

        if (flag==1 && document.all) {

        for (i=message.length-1; i>=1; i--) {

                        xpos[i]=xpos[i-1]+step

                        ypos[i]=ypos[i-1]

        }

        xpos[0]=x+step

        ypos[0]=y

        for (i=0; i<message.length-1; i++) {

        var thisspan = eval("span"+(i)+".style")

        thisspan.posLeft=xpos[i]

                        thisspan.posTop=ypos[i]

        }

        }

        else if (flag==1 && document.layers) {
```

```
        for (i=message.length-1; i>=1; i--) {

                        xpos[i]=xpos[i-1]+step

                        ypos[i]=ypos[i-1]

        }

        xpos[0]=x+step

        ypos[0]=y

        for (i=0; i<message.length-1; i++) {

        var thisspan = eval("document.span"+i)

        thisspan.left=xpos[i]

                        thisspan.top=ypos[i]

        }

        }

        var timer=setTimeout("makesnake()",30)

}
```

/* prelevato su dominioweb: http://www.dominioweb.org */

</script>

Copia ancora quest'altro codice, ma stavolta all'interno di <body>:

<script>

<!-- Beginning of JavaScript -

```
for (i=0;i<=message.length-1;i++) {

   document.write("<span id='span"+i+"' class='spanstyle'>")

        document.write(message[i])

   document.write("</span>")

}

if (document.layers){

        document.captureEvents(Event.MOUSEMOVE);
```

```
}
```

document.onmousemove = handlerMM;

// - End of JavaScript - -->

</script>

Script che provoca al puntatore del mouse un'immagine che lo insegue..nel nostro caso, una serie di cerchi. Il codice va inserito nella pagina dopo il tag <body>...ricordatevi anche di copiare

l'immagine ..
